MSP 7

Title
Frank and Lillian Gilbreth Papers

Date Span

Abstract
The Gilbreth Papers document the personal and professional lives of Frank and Lillian Gilbreth. The collection documents courtship, marriage, family life, and professional careers of the Gilbreths. The bulk of the collection contains materials documenting Lillian Gilbreth’s professional career following Frank’s death in 1924. Materials include: correspondence, diaries, scrapbooks, photographs, motion pictures, audio materials, slides, magazine and newspaper clippings, research materials, books, flow charts, and numerous awards.

Quantity
83.5 cubic feet

Language
English

Repository
Archives and Special Collections, Purdue University Libraries

Administrative Information

Access
Collection is open for research. Sections of the collection are stored offsite; 24 hours notice is required to access these materials. Portions of the collection contain materials which have limited access due to their fragile condition; restrictions will be lifted as these materials are restored. The Gilbreth Family Restricted materials have been restricted due to donor request; prior consent from the Gilbreth family is required before viewing.

Preferred Citation
Frank and Lillian Gilbreth Papers, Archives and Special Collections, Purdue University Libraries

Copyright Notice
Copyright and literary rights are held by the Gilbreth family.
Acquisition  Donated by the Gilbreth family; the bulk of the collection was donated in 1972.

Provenance/Custodial History  The Gilbreth Papers were donated to Purdue University by the Gilbreth family following the death of Lillian M. Gilbreth in 1972. Additional materials have been added by the family over the years. James S. Perkins donated his collection of Gilbreth compilation films and motion study materials he compiled with Lillian Gilbreth. These materials were added as a separate series to the collection in 1994.

Accession Number  1979-01

Location  ASC

Processed By  Joanne Mendes, 2006
Related Materials

The Gilbreth Library of Management
The Gilbreth Library of Management was donated to Purdue University by Lillian M. Gilbreth in 1939. The collection consists of the working papers of Frank and Lillian Gilbreth which covers their research in the fields of time management and motion study. These files are typically referred to as the “N-file.” Materials in the N-file include photographs, manuscripts, correspondence, notes, blueprints, newspaper clippings, reports, and research materials collected by the Gilbreths.

The Gilbreth Book Library
The Gilbreth Book Library contains the personal library of Frank and Lillian Gilbreth and consists of approximately five hundred books and sixty journals. Subjects include: management, psychology, labor relations, industrial economics, education, construction, engineering, health, home economics, and photography. [Note: the library is housed at Purdue’s Industrial Engineering Department located at Grissom Hall and is available by appointment only]

A. A. Potter Papers
Andrey A. Potter was a nationally recognized leader in engineering and scientific education and served as the Dean of Engineering at Purdue University from 1920 until his retirement in 1953. He was close personal friends with Frank and Lillian Gilbreth and was instrumental in bringing Lillian into the engineering faculty at Purdue in 1935. The Potter Papers contain personal correspondence between Potter and the Gilbreths, photographs, and clippings that Potter collected regarding Lillian’s career.

Edward C. Elliott Papers
Purdue President Edward C. Elliott persuaded Lillian Gilbreth to join the faculty at Purdue in the 1930s in an effort to promote educational opportunities in the sciences for young women. The Elliott Papers contain newspaper clippings and correspondence regarding Lillian Gilbreth.

Alice Rice Cook Papers
Alice Rice Cook was a colleague and personal friend of Lillian M. Gilbreth. They co-authored the book, The Foreman in Manpower Management in 1947. Cook worked as an employee relations consultant and was the supervisor of the Employee Relations Training Program of the City College of New York. The Alice Rice Cook Papers contain clippings regarding the Gilbreths, correspondence with Lillian Gilbreth, and correspondence and materials regarding the death of Lillian Gilbreth.

Biographies of Frank and Lillian Gilbreth

Frank Bunker Gilbreth was born July 7, 1868 to John and Martha (Bunker) Gilbreth of Fairfield, Maine. The youngest of three children, Frank enjoyed a quiet childhood until his father’s sudden death from pneumonia in 1871. For financial reasons, his mother was forced to move Frank and his sisters, Anne and Mary, to Boston where Martha opened a boardinghouse. Martha successfully managed the boarding house and along with a small income from her sister Caroline’s artwork, was able to support the family and put her two daughters through college. After passing the MIT entrance exams in the summer of 1885, Frank decided to forgo higher education and entered the construction trade as a bricklayer’s assistant. Frank noted that the bricklayers with whom he trained all had different approaches to bricklaying and he soon devised a method which eliminated unnecessary motions and greatly increased productivity. Frank quickly worked his way up within the company and was soon able to support his mother and aunt. In 1895, he started his own contracting firm, Frank Gilbreth and Company. The company became famous for finishing projects early and under budget. In 1902, Frank’s firm finished building a laboratory for MIT in eleven weeks, a feat which so impressed a young engineering student that he begged the president of the university to arrange a meeting. The student was Andrey Potter (who later became the dean of engineering at Purdue University) and he and Frank Gilbreth became lifelong friends.

Lillian Evelyn Moller was born May 24, 1878 in Oakland, California to William Moller, a successful plumbing business owner, and Annie Delger Moller. The oldest surviving daughter of nine children, Lillian became adept at aiding her often ailing mother in the management of a large well-to-do household. A shy child, Lillian was home-schooled by her mother until she was nine. Once in school, Lillian excelled at her studies and ended up graduating high school with straight As. In 1896, she entered the University of California and became the first woman in the university’s history to deliver a commencement address when she graduated in 1900. The following fall, Lillian moved to New York to start her graduate work at Columbia University. An illness forced her to return to California but in 1901 she returned to the University of California and earned a master’s degree in literature. In the spring of 1903, Lillian, along with a group of friends, set out for the East Coast to begin a six month tour of Europe. They arrived in Boston and had a few days to sightsee before boarding their ship. One of her friends, Minnie Bunker, introduced Lillian to her cousin, Frank Bunker Gilbreth. Frank, a confirmed bachelor, became infatuated with Lillian and was waiting at the dock when her ship returned. Six months after their first meeting he proposed and on October 19, 1904 Frank and Lillian were married in the living room of her parents’ home in Oakland, California.

The marriage of Frank and Lillian Gilbreth began one of the most famous partnerships in engineering history. Lillian immediately became a full partner in Frank’s business, working with him first from home but soon joining him on job sites, at business meetings, and participating in industrial conferences. Frank relied on Lillian tremendously and affectionately referred to her as “Boss.” They collaborated on papers, speeches, lectures, and co-authored four books. In 1907, Frank met Frederick Winslow
Taylor, the developer of time study, and became a disciple of the Taylor System. The Gilbreths became deeply involved in scientific management research and Frank was instrumental in the creation of the Taylor Society. In 1912, the Gilbreths left construction and focused their attention on scientific management consulting. They broke with Taylor in 1914 and formed their own form of scientific management which focused on the human element as well as the technical. In 1915, Lillian received her doctorate in psychology and incorporated her training into the family business. She saw the need to improve worker satisfaction which would in turn improve overall job performance and worker efficiency. Frank designed his systems to ease worker fatigue and increase productivity by studying each movement a worker made in a process he called micromotion study. The Gilbreths used still photographs and film strips to study worker movement in order to devise the “One Best Way” to perform a task. The Gilbreths also saw the need to improve the physical comfort of the worker and their innovations in office furniture design were ahead of their time and led the way to the study of ergonomics.

The Gilbreths’ work in time management and efficiency carried over into their personal lives. Early on, Frank and Lillian agreed to have twelve children, six boys and six girls, a feat which they accomplished in seventeen years. The children Anne, Mary (died at the age of six from diphtheria), Ernestine, Martha, Frank Jr., Bill, Lillian, Fred, Dan, John, Bob, and Jane soon became willing participants in their parents’ studies. The older children were assigned younger siblings to care for and all had daily housekeeping tasks, including the toddlers, who were given table legs to dust. Often Frank would recruit the children for help with his research including his motion studies on typing and surgery. The Gilbreths’ success raising a large family in which both parents worked full time was a testimony to their achievements in management and efficiency and their love for one another. After Frank’s sudden death from a heart attack in 1924, Lillian not only carried on with their work but also managed to put every child through college. Lillian retired in 1968 and died January 2, 1972.
Scope and Contents of the Collection

The Gilbreth Papers documents the professional and personal lives of Frank and Lillian Gilbreth. The collection consists of personal papers, letters, correspondence, photographs, and other memorabilia that Lillian Gilbreth collected during her life regarding her youth, marriage, family, and career. Types of materials in the collection include: personal correspondence between Frank and Lillian Gilbreth regarding their courtship, marriage, family, and work; correspondence between the Gilbreths and family members, family photographs of the Gilbreths, Frank and Lillian Gilbreth’s work diaries and scrapbooks, business correspondence, newspaper and magazine clippings, manuscripts, books, speeches, notes, articles, motion pictures, work related photographs, slides, audio recordings, flow charts, awards, citations, certificates, diplomas, honorary diplomas, artifacts from their motion study research, and printed ephemera from engineering conferences and meetings. Subjects include time study, motion study, fatigue in the workplace, psychology, photography, ergonomics, management, construction, and creating work environments geared toward the handicapped. The Gilbreth Papers are organized into fourteen series:

1. Diaries and Scrapbooks, ca. 1895-1967
2. Correspondence, ca. 1906-1970
3. Clippings, ca. 1913-1996
5. Conferences, ca. 1924-1972
7. Audio Visual, ca. 1915-1979
8. Flow Carts, ca. 1908-1938
9. Awards and Artifacts, ca. 1917-1984
11. Family & Personal Life, ca. 1864-1972

Arrangement Note

The bulk of the collection was shipped to the university in 1972; additional materials sent by the family have continued to be added to the collection over the years. The collection was arranged by library staff in collaboration with Ernestine Gilbreth Carey. A large portion of materials were originally classified as restricted by the Gilbreth family and stored separately from the collection. In 2006, the restrictions were lifted and the materials were incorporated into the collection. A small portion of materials have been kept on restricted access by library staff at the request of the Gilbreth family.
**Preservation Note**
All materials have been housed in acid-free, lignin-free folders and boxes. All newsprint has been photocopied. Oversized printed materials and photographs have been grouped into individual series for preservation purposes. Motion pictures and audio materials have been placed in archival containers and stored separately for preservation purposes. Motion pictures are being restored and converted to VHS and DVD formats as funding becomes available.

**Additions to Collection**
James S. Perkins donated his papers and films to the University in 1994. These materials were incorporated into the Gilbreth Papers due to the significance of Perkin’s work in collaboration with Lillian Gilbreth in the restoration and preservation of the original Gilbreth films. Additional Gilbreth materials collected by the libraries were separated into an addendum to the collection. In 2007, Charles Carey donated approximately 500 photographs from the estate of his mother, Ernestine Gilbreth Carey. These materials have been incorporated into the collection.
DETAILED DESCRIPTION OF THE COLLECTION

Series 1
Business Scrapbooks and Diaries, ca. 1895-1968
2.5 Cubic Feet

Location AS      Box 1      Business Scrapbooks, Lillian Gilbreth, ca. 1965-1967
1965
1966-1967
January – July, 1967

Location AS      Box 2      Business Scrapbooks, Lillian Gilbreth, ca. 1967-1968
August – December, 1967
January – April, 1968
April – December, 1968

Location AS      Box 3      Business Diaries and Appointment Calendar, Frank and Lillian Gilbreth, ca. 1895-1965
Diary, ca. 1953-1954 [Philippines]
Diary, 1959 [Europe]
Diary, 1960 [Fiji, New Zealand, Australia]
Diary, 1961 [Mexico, Paris, United States]
Diary, 1962 [Portugal]
Diary, 1964 [international]
Diary, 1965 [United States]
Frank Gilbreth Diaries, ca. 1895-1940
[Lillian Gilbreth’s personal typescript copy of Frank’s diaries and edited public copy]
Miscellaneous Originals, ca. 1918-1960s
[original miscellaneous diary pages of Frank and Lillian Gilbreth]
Appointment Calendar, 1952-1953
[Lillian Gilbreth's appointment calendar]

Location AS      Box 4      Oversized Business Scrapbook, Lillian Gilbreth, 1958
Scrapbook presented to Lillian Gilbreth at the banquet in honor of her 80th birthday, 1958
[Materials include clippings, photographs, cards, letters, notes, certificates, and telegram.
Correspondents include: Herbert Hoover, Dwight D. Eisenhower, Purdue President Emeritus Edward C. Elliott, Purdue President Frederick L. Hovde, presidents and deans from various universities, friends, and numerous engineering societies]
Location AS   Box 5   Oversized Business Scrapbook, Lillian Gilbreth, 1953
Australian Visit, 1953
[photographs, clippings, and engagement schedules; 2 scrapbooks]

Series 2
Correspondence, ca. 1906-1970
6.5 Cubic Feet

Location AS   Box 6   Correspondence, Frank and Lillian Gilbreth, ca. 1906-1959
Letters sent by Frank Gilbreth, ca. 1908-1924
[business letters to various individuals]
Letters received by Frank Gilbreth, ca. 1910-1923
[mainly business letters and postcards; includes telegram regarding Frank’s Army commission]
Correspondence between Captain Ellis and Frank Gilbreth, 1917-1918
Index of ideas sent to Captain Ellis by Frank Gilbreth, 1917-1918
Correspondence and letters sent by Lillian Gilbreth, ca. 1914-1959 [mainly business]
Undated
1914-1932
1930-1959

Location AS   Box 7   Correspondence, Lillian Gilbreth, ca. 1960-1966
1960-1963
1964-1965
1966

Location AS   Box 8   Correspondence, Lillian Gilbreth, ca. 1956-1968
Correspondence and letters sent by Lillian Gilbreth, 1967-1968 [mainly business]
1967
1968
Incoming Letters, ca. 1959-1968 [business and personal]
A, ca. 1960-1968
American Institute of Industrial Engineers, 1966
Bauch, Bernard M., 1959
B-Ben, ca. 1959-1968
Ber-Bz, ca. 1956-1968

Gilbreth Films, ca. 1918-1973
Note: Due to the extremely fragile nature of these original motion picture films, they are inaccessible until the originals can be restored and duplicated. The following films have been restored and duplicated, and can be accessed on DVD or VHS video tape: “Ball Brothers Mason Jars Study,” “Odds and Ends #2,” “Odds and Ends #3,” “Odds and Ends #4,” “The Quest for the One Best Way,” “Gilbreth Motion Study Sequences,” “Baby and Circular Workplace” (alternative title: “Circular Living”), “Dr. Lillian Gilbreth Lecture, International Development in Industrial Engineering,” “Transferring Eggs,” “Physically Handicapped Keeping House, Reel 1,” “Physically Handicapped Keeping House, Reel 2,” “Problems of Handicapped Homemakers,” Woman Packing Cans 1 & 2, Odds and Ends part 1, Woman with Box of Materials, Iowa Skill Study (1960), Principles in Motion Economy in the Home #1 [Thanks to the National Film Preservation Foundation for three generous grants].
All of the remaining films are currently inaccessible. Funding is currently being sought to restore these films.

**Motion Study Films, undated**

1. “Woman Packing Cans #1,” n.d. [woman in uniform cleaning and packing metal cans] [B & W, 16mm film loop, silent] [Note: duplicates are available for viewing on DVD or e-Archives]

2. “Woman Packing Cans #2,” n.d. [woman in uniform cleaning and packing metal cans] [B & W, 16mm, film loop] [Note: duplicates are available for viewing on DVD or e-Archives]

**Woman Packing Cans 1 & 2-TRT 1:30**

Scene 1: A woman is shown seated holding a two-pronged rod. She pinches the cotton strip to hold into place. She then wraps a cotton strip around the rod. She then stuffs the wound cotton into a metal can and pulls the two-prolonged rod out of the can and leaves the cotton in the can.

Scene 2: A woman is shown wrapping a long strip of cotton around a wooden cylinder. She then pushes the cotton into a metal can and pulls the cylinder out of the can, leaving the cotton stuffed inside.

**Frank & Lillian Gilbreth Motion Study Films, ca. 1918-1968**

3. Man with box of small white objects, n.d. [B&W, 35mm, silent] [Extremely fragile condition]

4. “Ball Brothers Mason Jar Motion Study,” ca. 1918 [original Gilbreth film] [B & W, 16 mm, silent] [Note: stored separately in stack area] [Note: duplicates are available for viewing on DVD]

5. Woman with box of materials, ca. 1941 [B&W, 35mm, silent] [Note: duplicates are available for viewing on DVD or e-Archives]

**Woman with Box of Materials-TRT 4:00**

Scene 1: A woman shown assembling small pieces of materials. She then places the small piece up against what appears to be a soldering iron. A clock is shown with a single hand turning.

Scene 2: A woman shown painting small pieces of materials with a small paintbrush. When she is finished painting a piece, she places it in a box nearby. A man holding a large mirror is shown standing behind the woman, revealing her hand motions from a different angle. A clock is shown with a single hand turning.

Scene 3: A woman shown assembling an object using multiple materials. In front of her is a box divided into a grid of smaller sections. She takes materials from each of the smaller sections to assemble the object. She also uses a long,
pointed tool to assemble the object. A man holding a large mirror is shown standing behind the woman, revealing her hand motions from a different angle. A clock is shown with a single hand turning.

6. “Odds & Ends #1,” ca. 1944 [James Perkins’ compilation of Gilbreth motion study films from the late 1900s-early 1920s produced in conjunction with Lillian Gilbreth] [B & W, 16mm, silent] [Note: stored separately in stack area] [Note: duplicates are available for viewing on DVD or e-Archives]

**Odds and Ends part 1**-TRT 34:00

Scene 1: Reads: Leader Strip-Beginning of Gilbreth Film “The Original Films of Frank B. Gilbreth” Presented by James S. Perkins In Collaboration with Dr. Lillian M. Gilbreth and Dr. Ralph M. Barnes Sponsored by the Chicago Chapter of the Society for the Advancement of Management

Scene 2: Street scene showing several people walk down a street towards the camera. Several old model cars are shown in the background.

Scene 3: In the first shot, a man shown sitting at a desk handling paperwork. On the desk a clock is shown with a single hand turning rapidly as the man works. In the second show, the man at the desk is handling paperwork while talking into a microphone attached to the desk. The clock running is in the right background.

Scene 4: Man’s shown talking facing the camera. He turns his face to the left and right. Face only shown.

Scene 5: Lillian Gilbreth shown speaking and facing the camera. Camera moves to the right somewhat. Two shots in two different outfits.

Scene 6: Men shown laying brick facing a brick wall. A clock is shown in the bottom right corner with single hand moving rapidly.

Scene 7: Still shot. People standing around pile of bricks.

Scene 8: Still shot. People shown standing on scaffolding in front of brick wall laying brick.

Scene 9: Still shot. Several stacks of bricks shown.

Scene 10: Still shot. Close up of stack of bricks. Hand is shown at right.

Scene 11: Men shown laying brick facing a brick wall. A clock is shown in the bottom right corner with single hand moving rapidly.
Scene 12: Two shots of street scenes. In one shot, a horse and wagon is shown crossing street. In another, an old-model car is driving.

Scene 13: A biplane is shown flying in the sky.

Scene 14: In the first shot, man shown stamping pieces of paper. He takes a piece of paper from a stack to his right. He puts the paper under a stamp and presses down on the stamp. He then takes the paper and puts it off to his right. A clock is shown at right with single hand moving. In the second shot, a man is shown stamping pieces of paper. He takes a piece of paper from a stack to his left, places the paper under a stamp, stamps the paper, then takes the paper and puts it to his right. Meanwhile, he is preparing another piece of paper for stamping. A clock is shown at right with single hand moving.

Scene 15: A person is shown filing small pieces of material on a block. After each piece is filed, it is moved off the block. The person then picks up another piece of material and files it.

Scene 16: Two shots showing men rowing a long rowboat in a river. In the first shot, a clock is shown with single hand turning.

Scene 17: A person shown pouring a liquid from a glass tube into another tube attached to a burner. They also use a dropper to put some liquid in the tube. The person then appears to write on the first tube.

Scene 18: A soldier wearing a helmet surrounded by brush is shown manning what appears to be a machine gun.

Scene 19: A man in a lab coat is shown assembling a metal object with screws. He places a base inside a vice and attaches a shaped piece of metal to the base with screws. He removes the base from the vice and places another base in the vice. He then places an attachment to the new base. A clock is shown at right with single hand moving.

Scene 20: In the first shot, a woman is shown peeling some fruits/vegetables and then wiping those fruits/vegetables off with a cloth. The fruits/vegetables appear to be in large wooden bins. In the second shot, a woman is shown peeling some fruits/vegetables and then wiping those fruits/vegetables off with a cloth. The fruits/vegetables are taken from an angled board and placed in front of the woman.

Scene 21: A woman is shown taking sealed boxes and removing the lid from the base. She then organizes the boxes into a grid on a table. She places some dark-colored materials into the each of the boxes. She then places all the lids on top of the grid of box bases. She then fits the lids on each box and places the sealed boxes in a series of stacks. A clock is shown with a single hand turning.
Scene 22: Lillian Gilbreth is shown placing objects in boxes and putting the lid on them. Frank Gilbreth is shown seated near Lillian writing and talking to her. A clock is shown with a single hand turning.

Scene 23: Woman shown packing small, dark objects into boxes. She then puts some form of packaging on top of the objects. She then puts a lid on the box.

Scene 24: A man shown taking objects from a wooden box and putting them in three other wooden boxes adjacent. He uses two hands to move two objects into the closest box, then to the next closest, then third closest. He repeats. Then he does the same with a single hand. A clock is shown with a single hand turning.

Scene 25: A man shown standing in front of a machine. He loosens a metal machine cradle at three places with a lug wrench. He removes small metal cylinders from the cradle and then places three small metal cylinders into the cradle and tightens the cradle at three places with the lug wrench. He then does this again at a different cradle.

Scene 26: In the first shot, a person is shown pushing small objects against the blade of a circular saw, cutting the object into small, round, chips. In the second shot, the person is shown pushing a wedge with one hand towards the circular saw blade. With the other hand, the person puts a small, round object against the wedge, which carries it up to the blade and slices it into small, round chips. A clock is shown with a single hand turning.

Scene 27: Two men in hats shown looking at what appear to be empty shelves. A clock is shown with a single hand turning.

Scene 28: Two men shown packing small boxes labeled “LUX” into larger cardboard boxes. The first man pushes a line of LUX boxes down a platform towards the second man, who packs the LUX boxes into a larger cardboard box. Two other men in suits are watching the men packing boxes. When one line of boxes is packed, the men in suits push another line of boxes towards the two packers. A clock is shown with a single hand turning.

Scene 29: In the first shot, two men shown dropping stones onto a large pile of stones. The men use two wood plank ramps that are set against the pile, with one end of each plank at the top of the pile and the other end on the ground. The men pick up a stone, walk up one plank, drop the stone on the pile, then walk down the other plank. They do this several times, then take a break by sitting on a wooden box on the ground. Then they pile several more stones. In the second shot, the men pile the stones using the planks while two other men stand nearby observing. The third shot is a close up of the men picking up the stones from a pile. A clock is shown with a single hand turning. In the fourth shot, the men pile...
stones again using two planks, but in a different location and slightly different configuration of planks.

Scene 30: A wooden box is shown with open end facing camera. The box is filled with hollow metal cylinders. A hand is shown placing a small wooden plank in the open end of the box. A tag is then attached to one edge of the side of the box. The hand then spins the tag around. A clock is shown with a single hand turning.

Scene 31: A metal scale is shown. A man is shown putting a few washers in a small pan at the top of the scale. He then takes a box of washers and pours them into a larger pan at the bottom of the scale. He takes the pan and turns it so that the inside faces the camera, revealing the washers. A clock is shown with a single hand turning.

Scene 32: A man is shown standing in front of a wall of shelving. The shelves are organized into boxes. Each box has a tag attached to it. The man is pushing a box cart on wheels. Inside the box is another box divided into a grid. In several squares of the boxes are tags. The man turns the box to show the tags to the camera. A clock is shown with a single hand turning.

Scene 33: Two drawers shown sitting on a surface. The inside of the drawers are divided into a grid and materials are divided into different boxes of the grid. The words “Waiting For” are written on the surface supporting the drawers. A clock is shown with a single hand turning.

Scene 34: A man shown moving a wooden pallet full of materials using a manual forklift.

Scene 35: A woman is shown holding an envelope from which she pulls a stack of cards. She flips through the stack of cards and then places them back in the envelope. A clock is shown with a single hand turning.

Scene 36: A person’s hands are shown with lights attached by rings on the index fingers. The lights are connected by wire to a circuit board. The hands move around in a circle. The screen then goes dark except for the lights, showing the motion of the hands. The outer lights then come back on showing the hands still moving.

Scene 37: A person shown standing in front of a machine with belts running in the background. Next to the machine is a pile of wooden rods. The person takes a rod and puts it into the machine, pulls down a lever on the machine, then pulls the rod away. Repeats.

Scene 38: A series of dioramas showing different motion paths in three dimensions. A person’s hand is shown pointing at different parts of the paths with a pencil. A clock is shown with a single hand turning.
Scene 39: In the first shot, a woman seated at a desk shown typing on a typewriter. A clock is shown with a single hand turning. In the second shot, the woman’s face is shown and she talks, facing the camera. In the third shot, the woman’s hands are shown at the type writer typing. A translucent grid is shown in front of the shot of her hand.

Scene 40: In the first shot, a baseball field is shown where a man is kneeling next to a Gilbreth clock. Several baseball players are shown in the background. In the second shot, a pitcher is shown standing on a mound, pitching to batters. A clock is shown with a single hand turning.

Scene 41: In the first shot, a man shown disassembling a machine. As he removes each part, a card is shown to the camera. After removing the first part, a card is shown reading: “Bolt.” After removing the second part, a card is shown reading: “Lock frame.” In the second shot, a table surface is shown with many of the parts from the disassembled machine. The parts are of all different sizes and shapes. In the last shot, the man is shown reassembling some of the parts.

Scene 42: A man shown handling paper work at a desk.

Scene 43: A man shown typing on a typewriter using one hand.

Scene 44: An operating room is shown through multiple shots. Multiple people shown working on a surgery, all dressed in masks, hats, gloves, and gowns. Many of the hats and gowns are labeled with numbers or letters. In one shot, three people’s hands are shown sowing up an incision.

Scene 45: Lillian Gilbreth shown seated with nine children. A man is shown in the background.

Scene 46: Three of the Gilbreth children shown walking outside near some trees.

Scene 47: Two shots of the Gilbreth children, with one in each shot. One boy and one girl.

Scene 48: Gilbreth children shown sitting on both ends of a wooden seesaw.

Scene 49: Gilbreth children playing leap frog over wooden posts.

Scene 50: Gilbreth children doing head stands on a beach.

Scene 51: Gilbreth children shown doing somersaults on a beach.

Scene 52: Gilbreth children shown standing on each other’s shoulders.

Scene 53: Gilbreth children shown playing in the water.
Scene 54: Lillian Gilbreth shown seated with multiple children.

Scene 55: Reads: The End “The Original Films of Frank B. Gilbreth”

Scene 56: A solider shown seated on the ground near what appears to be a machine gun.

Scene 57: Man in lab coat shown assembling a small piece of metal. A clock is shown with a single hand turning.

Scene 58: A man shown standing in front of a machine. He loosens a metal machine cradle at three places with a lug wrench. He removes small metal cylinders from the cradle and then places three small metal cylinders into the cradle and tightens the cradle at three places with the lug wrench. He then does this again at a different cradle.

Scene 59: In the first shot, two men shown dropping stones onto a large pile of stones. The men use two wood plank ramps that are set against the pile, with one end of each plank at the top of the pile and the other end on the ground. The men pick up a stone, walk up one plank, drop the stone on the pile, then walk down the other plank. They do this several times.

Scene 60: Three of the Gilbreth children shown walking outside near some trees.

Scene 61: Gilbreth girl shown smiling and shaking her head.

Scene 62: Lillian Gilbreth shown seated with multiple children.

7. “Odds & Ends #2,” ca. 1944 [James Perkins’ compilation of Gilbreth motion study films from the late 1900s-early 1920s produced in conjunction with Lillian Gilbreth] [B & W, 16mm, silent] [Note: duplicates are available for viewing on DVD or e-Archives]

8. “Odds & Ends #3,” ca. 1944 [James Perkins’ compilation of Gilbreth motion study films from the late 1900s-early 1920s produced in conjunction with Lillian Gilbreth] [B & W, 16mm, silent] [Note: stored separately in stack area] [Note: duplicates are available for viewing on DVD or e-Archives]

9. “Odds & Ends #4,” ca. 1944 [James Perkins’ compilation of Gilbreth motion study films from the late 1900s-early 1920s produced in conjunction with Lillian Gilbreth] [B & W, 16mm, silent] [Note: stored separately in stack area] [Note: Reel duplicates divided into Reels A, B, and C] [Note: duplicates are available for viewing on DVD or e-Archives]

“Odds & Ends [#4]”-TRT 47:41
Scene 1: Man is standing, transferring parts from a stand to a box while being timed and supervised by another man

Scene 2: Woman is seated at table transferring items from a large box to a smaller container, while being timed (a scene marker is shown)

Scene 3: Woman is standing at an assembly line preparing items as they come down the line with a knife, then wipes them with a cloth, while being timed (a scene marker is shown)

Scene 4: Woman is preparing the same item with a knife and cloth, but doing so by removing them from a box placed on a table, while being timed

Scene 5: Reads: Pre-position parts during machine time to facilitate grasping during machine down-time. Note the time for grasping for each method. The improved method provided for: shortened reaching. Smoothly curved motions instead of motions with abrupt stops or sharp turns. Use of gravity feed container. Drop delivery for damaged bars to waste bin. Opportunity [sic] to sit or stand at will which is accepted as a more restful way to work

Scene 6: Woman is shown seated with inclined shoot to her left dropping bars she works over a waste bin. She pulls a lever to tilt the box to facilitate grasping and wiping the product with a cloth, while being timed

Scene 7: Reads: The improved method provided for: shortened reaching smoothly curved motions instead of motions with abrupt stops or sharp turns. Use of gravity feed container. Drop delivery for damaged bars to waste bin. Opportunity [sic] to sit or stand at will which is accepted as a more restful way to work

Scene 8: Man is again shown standing, transferring parts from a stand to a box while being timed and supervised by another man

Scene 9: Reads: The second machine has a packet for pre-positioning parts during the machine time which is otherwise idle time for the operator. Use of the packet reduces the time for grasping during the machine down-time, and thus increases output. Compare the time for grasping non-pre-positioned parts with that of pre-positioned parts. The improved method provided for: shortened reaching smoothly curved motions instead of motions with abrupt stops or sharp turns. Use of gravity feed container. Drop delivery for damaged bars to waste bin. Opportunity [sic] to sit or stand at will which is accepted as a more restful way to work

Scene 10: Woman is shown cutting items that are being arrange on an incline by a man, while being timed

Scene 11: Man in hat is shown ratcheting pieces into place on a machine
Scene 12: Man in vest and bow tie is shown stamping cards, while being timed

Scene 13: Reads: Two Handed Motion pattern-2300 per hour, 21% more output than the One Handed Method

Scene 14: Man in jacket and tie is shown stamping cards in a new set up, while being timed

Scene 15: Reads: Two Hands and One foot-3050 per hour, 61% more output than the One Handed Method

Scene 16: Man in tie is shown stamping cards in yet another new set up, while being timed

Scene 17: Two men are picking up stones and carrying them to the top of a larger pile, via two boards being utilized as ramps, while being observed by a man with a clipboard

Scene 18: A man is shown standing moving items from one container to another, using two hands, while being timed and a metronome is present

Scene 19: (appears to be reversed image of scene 2) Woman is seated at table transferring items from a large box to a smaller container, while being timed (a scene marker is shown)

Scene 20: (appears to be reversed image of scene 3) Woman is standing at an assembly line preparing items as they come down the line with a knife, then wipes them with a cloth, while being timed (a scene marker is shown)

Scene 21: (appears to be reversed image of scene 4) Woman is preparing the same item with a knife and cloth, but doing so by removing them from a box placed on a table, while being timed

Scene 22: Woman in hat is standing preparing items two at a time for final packaging, while a man is seated taking notes, while she is being timed

Scene 23: Close up of man’s face talking to camera

Scene 24: Man seated at cluttered desk, holding pencil, and talking into a machine, while being timed

Scene 25: outdoor streets shot showing vehicles and people passing by while being timed

Scene 26: multiple doctors performing surgery on a patient under anesthesia
Scene 27: (Scene marker reads: inoculating tubes, Dr. Canavan) A woman is shown seated at a table, preparing the tubes with candle, while being timed

Scene 28: Woman appears to be standing at table preparing inoculation tubes (scene marker barely visible)

Scene 29: Three men, two dressed in white, one in black appear to be practicing stitches on a cloth

Scene 30: (appears to be extended version of scene 11) Man in hat is shown ratcheting pieces into place on a machine

Scene 31: Reads: The End “The Original Films of Frank B. Gilbreth”

Scene 32: Woman standing at desk in front of files, while being timed

Scene 33: Woman sitting while writing with a machine to her left (calculator?)

Scene 34: Reads: For ordinary cleaning remove only—

Scene 35: Man sitting putting working with some wires that are attached to some canisters and other components mounted on a board

Scene 36: Scene switches back and forth between little dioramas with wires and components and a man shown standing at a electric drill working with posts, all with timers

Scene 37: A seated group of people with a woman holding an infant with eight other children and a man

Scene 38: (appears to be a repeat of scene 4) Woman is preparing the same item with a knife and cloth, but doing so by removing them from a box placed on a table, while being timed

Scene 38: A different woman is shown preparing an item with a knife while seated at a table

Scene 39: A woman is timed while pasting labels onto boxes while standing

Scene 40: A man in coveralls is shown standing, writing on a piece of paper, while being timed

Scene 41: Written on a table in white reads: “Waiting For Move Man” Then shows men dressed in white medical gowns standing with backs to camera in front of a draped table holding many bowls, then pans over to show patient unconscious on table while being worked on
Scene 42: Men in white gowns shown practicing stitches

Scene 43: individuals completely covered by white clothing have letters printed on their clothing, one A’s and one B’s. They are standing in a room with many trays and bowls and instruments, presumably medical. They are joined by others that are also covered in white and are labeled with other letters and numbers. A patient covered with a sheet in brought in on a tilted table

Scene 44: (appears to be an extended version of scene 36, including a scene marker) Scene switches back and forth between little dioramas with wires and components and a man shown standing at an electric drill working with posts, all with timers

Scene 45: Cards that say “lock frame” and “barrel extension” “barrel” “all that remains is..” “empty casing” “water jacket” are held in front of a man that is taking apart a piece of machinery

Scene 46: Reads: “Clean and oil all parts in this manner—“

Scene 47: Man stands in front of a table with various parts laid out and is shown cleaning and oiling them

Scene 48: (a scene marker sits on the ground) Two men in coveralls are shown working on a very large piece of machinery and are then joined by a man in a suit

Scene 49: (appears to be a repeat of scene 17) Two men are picking up stones and carrying them to the top of a larger pile, via two boards being utilized as ramps, while being observed by a man with a clipboard

Scene 50: A man in a suit is seated in front of a typewriter and is typing with his right hand. The typewriter has four rolls of paper attached behind it, apparently making four copies simultaneously

Scene 51: a woman is shown seated typing with two hands while being timed

Scene 51: Close up shot of hands typing

Scene 52: A different woman is shown typing with two hands with a man sitting across from her, presumably dictating off of a paper, while being timed

Scene 53: Woman is typing with right hand while left hand is reading brail? She looks at the camera and not at her work while a man stands behind her and is intermittently taping her on her shoulder, while being timed

Scene 54: A very brief shot of a baseball game
Scene 55: A woman is standing in front of a table with many boxes lined up and is preparing them to be filled with product.

Scene 56: A scene marker is flashed and then the woman begins putting lids on all the boxes, while being timed.

Scene 57: Woman is removing product from a wooden box behind her and is placing it into the prepared boxes on the table, while being timed.

Scene 58: (appears to be a repeat of scene 18) A man is shown standing moving items from one container to another, using two hands, while being timed and a metronome is present.

Scene 59: (appears to be a repeat of scene 1) Man is standing, transferring parts from a stand to a box while being timed and supervised by another man, a metronome is also being utilized.

Scene 60: (appears to be an extended version of scenes 11 and 30) A scene marker is present that reads partially: “Feb. 2 1916, Milling Bushings on MX2, Mr. J. Roy” Man in hat is shown ratcheting pieces into place on a machine.

Scene 61: A scene marker is utilized as well as a timer. A man in white coveralls is seated in front of an electric saw and is cutting small round items rapidly. First, with his bare hand and later with the aid of a stick to guide the objects.

Scene 62: Woman is seated and is switching between two separate hand held sanders/rasps to file a very small object that is being held in place by a vice, while being timed.

Scene 63: Same woman is performing the same duty; however the tools are placed in a container that holds them in place.

Scene 64: (appears to be a different version of scene 48) A scene marker sits on the ground. Two men in coveralls are shown working on a very large piece of machinery.

Scene 65: A man stands in front of a table, reading directions while putting together a machine, while being timed. A scene marker partially reads: “A Packet System Developed by Motion Study 8-8-19”

Scene 66: Close up shot of a woman placing small items in to a wooden holder and using a metal file, then flips it out with the file and continues the process, while being timed (a scene marker is flashed).

Scene 67: (different version of scene 65) A man stands in front of a table, reading directions on a clipboard with machine, while being timed.
Scene 68: (different version of scene 66) Close up shot of a woman placing small items into a wooden holder and using a metal file, then flips it out with the file and continues the process, while being timed (a scene marker is flashed)

Scene 69: (possible repeat of scene 26) multiple doctors performing surgery on a patient under anesthesia

Scene 70: woman preparing inoculation tubes, two at a time, with Bunsen burner, tubes are arranged in wire baskets, while being timed

Scene 71: several scenes in quick succession of men practicing stitches, possible repeats

Scene 71: Reads: “While this expert assembles the gun without lost motions, see how many parts you can name.”

Scene 72: Reads: “Some of the Positions for firing.”

Scene 73: Reads: “The Browning Machine Gun (First Section) Taken at The Infantry School of Arms, Fort Sill, Okla.”

Scene 74: Reads: “Mrs. Gilbreth and nine of their eleven children”

Scene 75: Reads: “Gilbreth made many films to train our men in World War I, part of one of the films follows [sic].”

Scene 76: Reads: “Laboratory Studies of Transport Empty, Grasp, Transport Loaded, release Load-One Handed and Two Handed”

Scene 77: Reads: “The Improved Method provided for: Shortened reaching, Curved motions instead of motions with abrupt stops and changes in direction, Use of gravity feed container, Drop delivery of damaged bars to waste bin, More restful-opportunity to sit or stand at will”

Scene 78: Reads: “By the Gilbreth system of motion analysis 18 therbligs [sic] per brick were originally required in laying bricks. With all improvements 5 therbligs per brick was attained, and this increased output from 175 bricks per hour to 350 bricks per hour and furthermore was less fatiguing.”

Scene 79: Reads: “Gilbreth thought that the motion study principles could be applied to surgical operations as well as shop work.”

Scene 80: Reads: “Gilbreth encouraged the standardization of surgical routines and specific assignments for each doctor and nurse for all common surgical operations. I, II, and III for doctor’s assignments, A, B, and C for nurse’s assignments”
Scene 81: Reads: “Part of a study of finger motions which led to the Dvorak Keyboard which provides for distribution of work in accordance with the finger capacities and greater output.”

Scene 82: (possible repeat of scene 25) outdoor streets shot showing vehicles and people passing by while being timed

Scene 83: (possible repeat of scene 20) Woman is standing at an assembly line preparing items as they come down the line with a knife, then wipes them with a cloth, while being timed (a scene marker is shown)

Scene 84: (possible repeat of scene 21) Woman is preparing the same item with a knife and cloth, but doing so by removing them from a box placed on a table, while being timed

Scene 85: (possible repeat of scene 10) Woman is shown cutting items that are being arrange on an incline by a man, while being timed

Scene 86: Reads: “Original Method of Labeling Cartons”
Scene 87: woman stands in front of table with a stack of boxes she is pasting labels with a brush on a board and then lays them out on the table separately, then moves a small stack of boxes to the other side of the table to place the labels on them, while being timed

Scene 88: Reads: “Gilbreth Method of Labeling Cartons”

Scene 89: Woman pastes a large board with a brush, then places labels onto the glue, presses a cloth over them, removes cloth, then places a small stack of boxes directly in front and proceeds to place labels on boxes, while being timed

Scene 90: Several combined scenes: Outdoor shot that begins by panning across trees and house and then shows two girls and a boy as well as a woman with a car in the background. Man walks up to camera from behind tree. Two children run across yard in front of a one story building. A boy in a sailor outfit walks towards camera. Three boys play football. Three children running through yard.

Scene 91: (extended version of scene 17) Two men are picking up stones and carrying them to the top of a larger pile, via two boards being utilized as ramps, while being observed by a man with a clipboard

Scene 92: Man is cranking a machine component (engine?) in a rotational motion, while being timed

Scene 93: Reads: “The same operation in semi-darkness with the cycle-graph lights attached to operator’s fingers.”

Scene 94: Very dark image of man in silhouette repeatedly pulling down on a lever
Scene 95: Woman in dark dress seated, typing on a typewriter whose housing has been removed to see the gears, while being timed.

Scene 96: (appears to be a different version of scene 65) A man stands in front of a table, reading directions while putting together a machine, while being timed.

Scene 97: (appears to be a different version of scene 61) A man in white coveralls is seated in front of an electric saw and is cutting small round items rapidly, while being timed.

Scene 98: Standing man takes small items from palm of hand and places them on a scale.

Scene 99: A wheeled cart is shown with many tools and objects on it.

Scene 100: Reads: “Frederick Taylor’s Pig Iron Carrying Experiment, Without rest periods, Load per day: 12 ½ Ton, Pay per day, $1.15, With rest periods properly spaced.

Scene 101: (appears to be a repeat of scene 29) Three men, two dressed in white, one in black appear to be practicing stitches on a cloth.

Scene 102: (appears to be a repeat of scene 11) Man in hat is shown ratcheting pieces into place on a machine.

Scene 103: Two combined outdoor scenes. Two children playing. A woman walks toward the camera.

Scene 104: A table is shown with a typewriter on it and below are pedals.

Scene 105: Surgical scene.

Scene 106: (appears to be a repeat of scene 12) Man in vest and bow tie is shown stamping cards, while being timed.

Scene 107: Reads: “Two Handed Motion Pattern-2300 per hour, 21% more output than the One Handed Method.”

Scene 108: (appears to be repeat of scene 14) Man in jacket and tie is shown stamping cards in a new set up, while being timed.

Scene 109: Reads: “Two Hands and One Foot – 3050 per hour, 61% more output than the One Handed Method.”

Scene 110: A man in a tie is stamping cards with the Two Hands and One Foot method, while being timed. (Time in this scene is 47:41)
Probably where “Odds & Ends ‘B’” begins:

Scene 111: Two men are shown outside piling wood against a house, while a man in a suit is holding a clipboard and watching.

Scene 112: A man is shown moving unidentified objects from one box to another, while being timed.

Scene 113: Reads: “The Browning Machine Gun (First Section) Taken at The Infantry School of Arms, Fort Sill, Okla.”

Scene 114: Reads: “This gun fires 20,000 rounds in one hour and ten minutes without a stoppage – Government Test.”

Scene 115: Reads: “The parts, you see, are arranged in a Dependent Sequence.”

Scene 116: Parts of the Browning Machine Gun are shown on a table.

Scene 117: Reads: “For ordinary cleaning, remove only –”

Scene 118: Shows a man removing parts from a Browning Machine Gun, while a man holds cards that identify the parts. (Time in this scene is 52:00)

Probably where “Odds & Ends ‘C’” begins:

Scene 119: Reads: “Clean and oil all parts in this manner –”

Scene 120: Shows a man cleaning and oiling the machine gun parts.

Scene 121: Reads: “While this expert assembles the gun without lost motions, see how many parts you can name.”

Scene 122: Shows a man putting the machine gun parts back together, while another man holds a sign that reads: “In screwing barrel into barrel extension, adjust to prevent ruptured cartridges.”

10. “Original Films of Frank Gilbreth,” ca. 1944 [James Perkins’ compilation of Gilbreth motion study films from the late 1900s-early 1920s produced in conjunction with Lillian Gilbreth] [B & W, 16mm, silent] [Note: stored separately in stack area]
11. “Original Films of Frank Gilbreth,” ca. 1944 [negative print] [Note: stored separately in stack area]

33. “Transferring Eggs,” ca.1951 [woman transferring eggs from a carton to a egg holder; instructional film by Jane Callaghan and Betty Jane Johnston, produced by the University of Connecticut] [B & W, 16mm, silent] [Note: duplicates are available for viewing on DVD]

“Transferring Eggs" (For Film Analysis)- TRT 6:45

Presented by the University of Connecticut Motion and Time Study Laboratory
By Jane Callaghan and Betty Jane Johnston
Directed by Harold E. Smalley

Scene 1: “Original Method” A woman is seated at a table and is shown transferring eggs from a box to a different container that she holds in one hand, while being timed
Scene 2: "Improved Method" A woman is seated at a table and shown transferring eggs from a box to a different container using both hands, while being timed
Scene 3: “Original Method” is repeated
Scene 4: "Improved Method” is repeated
Scene 5: “Original Method” is repeated
Scene 6: "Improved Method” is repeated
Scene 7: “Original Method” is repeated
Scene 8: “Improved Method” is repeated
Principles in Motion Economy in the Home - TRT 16:30

Scene 1: Reads: MOTION AND TIME STUDY LABORATORY University of Connecticut Methods Measurements Under the supervision of Harold E. Smalley Distributed by Audio-Visual Aids Center. Produced in cooperation with School of Home Economics Elizabeth Eckhardt May, Dean and School of Business Administration Laurence J. Ackerman, Dean University of Connecticut. A portion of the material in this film is reproduced by permission from "Motion and Time Study," R.M. Barnes, John Wiley & Sons, Inc. 440 Fourth Avenue, New York 16, New York.

Scene 2: Reads: PRINCIPLES OF MOTION ECONOMY IN THE HOME By JANE CALLAGHAN and BETTY JANE JOHNSTON. Technical Assistant ROBERT E. DALEY. Directed by HAROLD E. SMALLEY. There are 22 principles which serve as guiding rules. They are classified into three categories: USE OF THE HUMAN BODY, ARRANGEMENT OF THE WORK PLACE, DESIGN OF TOOLS AND EQUIPMENT. These guiding rules will be illustrated by showing, for each principle, a job in which the rule is violated followed by a job which obeys the principle.

Scene 3: Reads: I Use of the Human Body 1. The two hands should begin as well as complete their motions at the same instant. When only one hand is used to take dishes from a cup-board productive work is cut in half.

Scene 4: Woman shown standing in front of cupboard. She reaches into the cupboard and takes dishes from the cupboard and puts them on a table. She uses two hands to lift large dishes, like a stack of plates. She uses one hand to remove each individual glass and teacup from the cupboard.

Scene 5: Reads: Two hands should work together when taking dishes from a cupboard.

Scene 6: Woman shown standing in front of cupboard. She reaches into the cupboard and takes dishes from the cupboard and puts them on a table. She uses two hands to lift large dishes, like a stack of plates. She also uses two hands to remove multiple glasses and teacups from the cupboard.

Scene 7: Reads: you can even break eggs two at a time if you have sufficient skill.

Scene 8: Person shown standing in front of bowl, with bowl sitting on table. Person picks up an egg in each hand. The person breaks both eggs at the
same time by tapping them on the lip of the bowl. They release the yolks into the bowl simultaneously.

Scene 9: Reads: The two hands should not be idle at the same time except during rest periods…….. The delay which causes the two hands to be idle is due to a wait for the pressing action of the flat plate ironer.

Scene 10: Woman shown sitting in front of flat plate ironer. She places fabric on the iron table and the flat plate ironer presses the fabric for a few seconds. Her hands are idle. After it rises, the woman adjusts the fabric so that a new section is underneath the iron. The flat plate ironer presses the fabric for a few seconds.

Scene 11: Reads: During rest periods the hands may be idle.

Scene 12: A woman is shown walking from right of frame towards a chair, where she sits down and puts her hand on forehead.

Scene 13: Reads: Motions of the arms should be in opposite and symmetrical directions, instead of in the same direction, and should be made simultaneously…. When dusting, hands moving in the same direction tend to upset body balance.

Scene 14: Woman shown dusting a table with dusting cloths in both hands. Hands are moving in same direction.

Scene 15: Reads: Hands moving simultaneously in opposite directions make dusting easier.

Scene 16: Woman shown dusting table with dusting cloths in both hands. Hands start off moving in same direction but then later diverge. Each hand dusts a different half of the table.

Scene 17: Reads: 4. Hand motions should be confined to the lowest classification with which it is possible to perform the work satisfactorily…….. Stopping to take potatoes from the bottom shelf in the cupboard uses the whole body.

Scene 18: Woman in kitchen shown crouching down, opening cupboard door, and taking potatoes with both hands to put them on a side drain board next to the sink. A clock is shown in the background with a second hand moving.

Scene 19: Reads: Reaching for a potato on the far side of the drain-board uses the entire arm.

Scene 20: A woman’s arm is shown in the first shot. In the second shot, a woman in kitchen shown standing at sink peeling potatoes. The potatoes are
placed on the drain-board far away from her, with a bowl in between her and the potatoes. A clock is shown in the background with a second hand moving.

Scene 21: Reads: Reaching for a potato nearby uses the forearm and hand.

Scene 22: A woman’s forearm and hand is shown in the first shot. In the second shot, a woman in kitchen shown standing at sink peeling potatoes. The potatoes are placed on the drain-board near her, with a bowl across from her and the potatoes.

Scene 23: Reads: Rinsing potatoes under the faucet uses hand motions.

Scene 24: A woman’s hand is shown in the first shot. In the second shot, a woman in kitchen is shown rinsing potatoes under a faucet. A clock is shown in the background with a second hand moving.

Scene 25: Reads: A close-up of potato peeling shows the use of finger motions.

Scene 26: A woman’s fingers are shown in the first shot. In the second shot, a woman’s hands are shown peeling potatoes above a sink. A clock is shown in the background with a second hand moving. The film appears to be in slow motion.

Scene 27: Reads: Counting pennies is another example of finger motions.

Scene 28: Woman shown in kitchen. She empties pennies from a coin bank onto the kitchen counter. Using her fingers on her right hand, she slides each penny off the counter into her left hand, which is underneath the counter. She does this until all the pennies are in her left hand.

Scene 29: Reads: 5. Momentum should be employed to assist the worker wherever possible, and it should be reduced to a minimum if it must be overcome by muscular effort......... Using the carpet sweeper with short, jerky strokes is a violation of this rule.

Scene 30: Woman shown using non-electric carpet sweeper on floral-print carpet. She pushes the sweeper back and forth in short strokes.

Scene 31: Reads. When the carpet sweeper is used with long sweeping strokes, momentum assists the worker.

Scene 32: Woman shown using non-electric carpet sweeper on floral-print carpet. She pushes the sweeper back and forth in long strokes.
Scene 33: Reads: Continuous curved motions are preferable to straight-line motions involving sudden and sharp changes in direction........ Abrupt changes in direction re time consuming and fatiguing to the operator.

Scene 34: A woman in kitchen shown polishing a silver tray. She dips her sponge in polish and wipes the tray several times with short, jerky, straight-line motions, moving back and forth across the tray.

Scene 35: Reads: Continuous circular motions are preferred when polishing a silver tray.

Scene 36: A woman in kitchen shown polishing a silver tray. She dips her sponge in polish and wipes the tray several times with smooth, round motions, moving back and forth across the tray and then around the perimeter.

Scene 37: Reads: 7. Ballistic movements are faster, easier, and more accurate than restricted or controlled movements. In controlled movements opposing groups of muscles are contracted; one group works against the other.

Scene 38: Woman shown in kitchen at sink. She holds an AJAX can over the sink upside down with her left hand and taps the bottom of the can with her right hand. She then wipes the inside of the sink with a sponge.

Scene 39: Reads: The ballistic movement is preferable to a controlled movement. Note the smooth, easy motions of the worker as she cleans the sink.

Scene 40: Woman shown in kitchen at sink. She holds an AJAX can over the sink upside down with her left hand and shakes the can. She then wipes the inside of the sink with a sponge.

Scene 41: Reads: Tossing paper into a wastebasket also illustrates ballistic movements.

Scene 42: Person’s hand shown in room with desk and wastebasket. The hand is holding crumpled pieces of paper. The hand tosses the pieces of paper into the wastebasket.

Scene 43: Reads: 8. Rhythm is essential to the smooth and automatic performance of a job and the work should be arranged to permit easy and natural rhythm wherever possible........ Lack of rhythm makes the job of dusting more tiring.

Scene 44: Woman shown dusting wooden desk with dust cloths in each hand. Her motions appear random and uneven.

Scene 45: Reads: Music will help the worker to dust with a natural and easy rhythm.
Scene 46: Camera starts zoomed in on record player playing a record. It zooms out to show the record player is next to the woman from Scene 45 dusting the same desk with the same cloths on each hand. However her motions are more even and circular in this scene.

Scene 47: Reads: II Arrangement of the Work Place 9. Definite and fixed places should be provided for all tools, implements, utensils, materials and ingredients. A disorganized jumble of utensils in a drawer makes it difficult to find the utensil that is wanted.

Scene 48: A person’s hands are shown opening a drawer with multiple, unorganized utensils in it. The person’s hand reaches for and grabs a knife, which is underneath other utensils. The person pulls the knife out of the drawer and closes the drawer.

Scene 49: Reads: Organized storage makes the job of selection easier.

Scene 50: A person’s hands are shown opening a drawer with multiple utensils in it. The utensils are stored in different organized boxes according to type. The person’s hand reaches for and grabs a knife, which is in a box with other knives. The person pulls the knife out of the drawer and closes the drawer.

Scene 51: Reads: Equipment should be stored at the place of first use. These utensils used first at the range, are stored near it.

Scene 52: A woman in kitchen shown standing in front of drawer with utensils in it. She opens the drawer and takes two utensils out, one with each hand. She holds the utensils up to the camera then places them back in the drawer. She then repeats this two more times, showing different utensils each time.

Scene 53: Reads: 10. Implements, materials and controls should be located around the work place and as close in front of the worker as possible…………. Controls are located on the front panel or on the back splash of a range. Note the difference in the ease of reaching the control from a standing and a seated position, and from the front and the side of the range.

Scene 54: Shot one shows woman standing in front of stove. She reaches to adjust control on back splash of range. Shot two shows woman sitting in front of stove. She reaches to adjust control on back splash of range. Shot three shows woman sitting beside a stove. She reaches to adjust control on back splash of range. Shot four shows woman standing in front of stove. She reaches to adjust control on front of range. Shot five shows woman sitting in front of stove. She reaches to adjust control on front of range.

Scene 55: Reads: 11. Gravity feed bins and containers should be used to deliver the material as close to the point of use as possible………… Taking flour from a canister, sifting, and then measuring it requires unnecessary motions.
Scene 56: Woman shown opening canister of flour. She scoops flour out of the canister and pours it into a gravity flour sifter. She then turns a crank to sift the flour out of the bin onto the kitchen counter. When she has sifted it all, she puts the bin off to the right.

Scene 57: Reads: The gravity flour sifter delivers sifted flour into the measuring cup.

Scene 58: A woman holds a measuring cup under a gravity feed bin. She turns a crank and sifts flour into the measuring cup and fills it up.

Scene 59: Reads: 12. Drop deliveries should be used wherever possible.......... Peeling potatoes on the drainboard, scraping them into the sink, and then down the disposal violates this rule.

Scene 60: Woman shown peeling potatoes over drainboard. After peeling a potato, she washes the potato under the sink facet and puts the potato in a pot nearby. She then scrapes the peels into the sink with a sponge.

Scene 61: Reads: Peeling potatoes over the garbage disposal illustrates a “drop delivery” in the home.

Scene 62: Woman shown peeling potato over a garbage disposal in a sink. After she peels the potato, she washes the potato and scraps the peelings into the disposal. She then turns on the facet, letting the water run. She puts a stopper in the sink and water starts to accumulate.

“Physically Handicapped Women Keeping House”-TRT 29:16

By Jane Callaghan, Betty Jane Johnston, and Gertrude Norcross
Directed by Harold E. Smalley
This segment begins with a written description of the purpose, which is to show how disabled individuals adjust to taking care of daily duties in the home with the hopes that close examination will bring to light ways that could alleviate difficulties.

Scene 1: Polio patient with leg braces and partially paralyzed arms preparing cereal for her child.
Scene 2: Polio patient in wheel chair cleaning house including dusting and sweeping.
Scene 3: Arthritic patient in wheel chair cooking and doing dishes
Scene 4: Cerebral palsy patient baking utilizing an electric stand mixer
Scene 5: Two cerebral palsy patients cracking nuts
Scene 6: Cerebral palsy patient sorting typed recipe cards
Scene 7: Disabled woman uses scissors on food
Scene 8: Disabled woman uses a knife on food
Scene 9: Woman peeling apple utilizing a homemade device
Scene 10: Blind woman ironing

39. “Meet the Therbligs,” ca. 1952 [film explaining the Gilbreth’s Therbligs concept, instructional film by Jane Callaghan and Betty Jane Johnston, produced by the University of Connecticut] [B & W, 16mm, silent, master copy]
40. “Product Analysis in the Home,” ca. 1952 [analyzing motion saving products for the home, instructional film by Jane Callaghan and Betty Jane Johnston, produced by the University of Connecticut] [B & W, 16mm, silent, master copy]

42. “Classes of Change in the Home,” ca. 1953 [work simplification in the home, instructional film by Jane Callaghan and Betty Jane Johnston, produced by the University of Connecticut] [B & W, 16mm, silent]
43. “Classes of Change in the Home,” ca. 1953 [instructional film by Jane Callaghan and Betty Jane Johnston, produced by the University of Connecticut] [B & W, 16mm, silent, master copy]
44. “Problems of Handicapped Homemakers,” ca. 1958 [handicapped homemakers performing household and child rearing tasks] [color, 16mm, silent] [Note: duplicates are available for viewing on DVD]

“Problems of Handicapped Homemakers-TRT 11:58

The segment shows the contrasts between an average mother caring for children and a disabled mother caring for children.

Scene 1: compares the tasks of feeding an infant while caring for a toddler
Scene 2: Shows different disabled woman performing tasks including:
dressing a child for out of doors, walking down stairs, washing dishes, feeding
an infant, doing laundry, cooking and other daily domestic tasks.

Produced in cooperation with School of Home Economics, Elizabeth Eckhardt
May, Dean and School of Business Administration, Laurence J. Ackerman,
Dean, University of Connecticut. Assisted by The Connecticut Society for
Crippled Children and Adults. Gertrude Norcross, Executive Secretary

45. “Iowa Skill Study (?)” ca. 1960 [film by James Perkins] [B & W, 16mm, silent]
[Note: stored separately in stack area] [Note: duplicates are available for
viewing on DVD]

“Iowa Skills Study”-TRT 48:15

The segment primarily shows the experiments involving placing a spring in
a die with tweezers. Other prominent scenes include golf strokes, packing cotton
into cans, putting rings into envelopes, and putting objects into cardboard boxes.

Scene 1: Reads: By Ralph M. barns Professor of Industrial Engineering
University of Iowa and James S. Perkins Industrial Engineer The Western
Electric Co. With the Assistance and Collaboration of J.M. Juran Manufacturing
Engineer The Western Electric Co.

Scene 2: Reads: The cycle time learning curve based on these data
appears consistent with previously established concepts. A second learning
curve excluding all fumbles and delays is a surprisingly flat curve. Two-thirds of
the ultimate reduction was... The subjects (students at the University of Iowa)
passed tests and examinations to which shop applicants are subjected prior to
hiring. One of these tests was the Johnson O’Connor dexterity test. The
operation was performed by grasping a relay spring from the supply tray by the
left hand. The left hand then turns the spring for the right hand to grasp by a pair
of tweezers. The right hand then locates the spring in the die, releases it, and…
Each subject performed 12,600 cycles during the five-week schedule in which
the performance time decreased to less than one-half of the starting time. Parts
were supplied by an attendant who would mix the ejected parts before
replenishing the supply tray.

Scene 3: Card: Skill Study WJ2 ES Normal Speed. Man shown using
tweezers to place relay spring in die. He then releases the die, which spins
quickly and dispenses the spring in front of the man. He loads the next spring
with the tweezers and repeats. Hands and face shown.

Scene 4: Card: Skill Study PK5 H Normal Speed
Man shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the man. While the die is spinning, he picks up the next spring and puts it in the tweezers and repeats. Hands shown.

Scene 5: Card: Skill Study Hecking Camera H Normal Speed

Clock with two hands shown with numerals 1 through 10 on its face. Short hand moves one numeral for every full rotation the long hand makes. Long hand makes several rotations.

Scene 6: Card: Skill Study Hecking Camera …H Slow Motion ½

Clock with two hands shown with numerals 1 through 10 on its face. Short hand moves one numeral for every full rotation the long hand makes. Long hand makes several rotations.

Scene 7: Man shown operating lathe. While the lathe is spinning, holding a copper-color cylinder, he pushes a sharp edge against the object. He shuts down the lathe and measures the cylinder with a caliper. Hands shown.

Scene 8: Card: Skill Study HB2 ES Normal Speed

Woman shown using tweezers to place relay spring in die. She then releases the die, which spins quickly and dispenses the spring in front of the man. She loads the next spring with the tweezers and repeats. Hands and face shown.

Scene 9: Woman shown using tweezers to place relay spring in die. She then releases the die, which spins quickly and dispenses the spring in front of the woman. While the die is spinning, she picks up the next spring and puts it in the tweezers and repeats. Hands and face shown.

Scene 10: Card: Skill Study HB6 H Slow Motion. Woman shown using tweezers to place relay spring in die. She then releases the die, which spins quickly and dispenses the spring in front of the man. She loads the next spring with the tweezers and repeats. Face shown.

Scene 11: Woman shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the woman. While the die is spinning, she picks up the next spring and puts it in the tweezers and repeats. Face shown.

Scene 12: Card: Skill Study KM 35 ES Normal Speed Soldiering. Woman shown using tweezers to place relay spring in die. She then releases the die, which spins quickly and dispenses the spring in front of the woman. While the die is spinning, she picks up the next spring and puts it in the tweezers and repeats. Hands and face shown.
Scene 13: Person shown putting small metallic cylinders in holes in a metallic square. Hands shown.

Scene 14: Woman shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the woman. While the die is spinning, she picks up the next spring and puts it in the tweezers and repeats. Hands shown.

Scene 15: Card: Skill Study WJ5 H Normal Speed. Man shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the man. While the die is spinning, he picks up the next spring and puts it in the tweezers and repeats. Hands shown.

Scene 16: Card: Skill Study WJ6 Slow Motion 2. Man shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the man. While the die is spinning, he picks up the next spring and puts it in the tweezers and repeats. Hands shown.

Scene 17: Card: Skill Study WJ10 ES Normal Speed. Man shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the man. While the die is spinning, he picks up the next spring and puts it in the tweezers and repeats. Hands and face shown.

Scene 18: Card: Skill Study WJ16 ES Normal Speed. Man shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the man. While the die is spinning, he picks up the next spring and puts it in the tweezers and repeats. Hands and face shown.

Scene 19: Card: Skill Study WJ22 ES Normal Speed. Man shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the man. While the die is spinning, he picks up the next spring and puts it in the tweezers and repeats. Hands and face shown.

Scene 20: Card: Skill Study WJ28 ES Normal Speed. Man shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the man. While the die is spinning, he picks up the next spring and puts it in the tweezers and repeats. Hands and face shown. At one point, a hand appears coming from out of frame and adjusts the light bulb in front of the die.

Scene 21: Card: Skill Study WJ34 ES Normal Speed. Man shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the man. While the die is spinning, he picks up the next spring and puts it in the tweezers and repeats. Hands and face shown.
Scene 22: Card: Skill Study WJ 35 ES Normal Speed Soldiering. Man shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the man. While the die is spinning, he picks up the next spring and puts it in the tweezers and repeats. Hands and face shown.

Scene 23: Card: Skill Study WJ5 Normal Speed. Man shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the man. While the die is spinning, he picks up the next spring and puts it in the tweezers and repeats. Hands shown.

Scene 24: Card: Skill Study WJ6 Slow Motion 2. Man shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the man. While the die is spinning, he picks up the next spring and puts it in the tweezers and repeats. Face shown.

Scene 25: Card: Skill Study WJ 34 ES Normal Speed. Man shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the man. While the die is spinning, he picks up the next spring and puts it in the tweezers and repeats. Hands and face shown.

Scene 26: Establishing shot of a golf course. Two men and two women shown golfing on a golf course. The woman putts. A series of shots show various people putting or driving the ball. A few shots show several people seated at a table, presumably at the golf course.

Scene 27: A woman is shown wrapping a long strip of cotton around a wooden cylinder. She then pushes the cotton into a metal can and pulls the cylinder out of the can, leaving the cotton stuffed inside. A side shot shows a man and woman standing next to a pillar in a factory. The preceding shot shows the factory floor with several women standing at different work stations doing various tasks.

Scene 28: Reads: Reel Two The Western Electric – Iowa Skill Study. This reel demonstrates the progress made by one subject in learning this “punch press” operation. Two views were taken of each sample, one showing the hands performing the task and the second showing the face as well as the hands, which provides an opportunity to study the eye movements. After 50 cycles of practice. Note hesitation of right hand while left hand grasps a part. At the most advanced stage this hesitation is largely eliminated.

Scene 29: Woman shown using tweezers to place relay spring in die. She then releases the die, which spins quickly and dispenses the spring in front of the woman. While the die is spinning, she picks up the next spring and puts it in the tweezers and repeats. Only hands shown.
Scene 30: Reads: The left hand does not always go to the proper end of the spring. This error requires than extra motion be made to re-grasp. Woman shown using tweezers to place relay spring in die. He then releases the die, which spins quickly and dispenses the spring in front of the man. While the die is spinning, she picks up the next spring and puts it in the tweezers and repeats. Only hands shown.

Scene 31: Reads: In watching the pictures taken of the operator's face note that she will look in three places, (1) to the supply tray to select a part, (2) to the die to place a part, and (3) to the transfer of the part from the left hand into the tweezers. In later stages she sometimes omits looking at the supply tray.

Scene 32: Woman shown using tweezers to place relay spring in die. She then releases the die, which spins quickly and dispenses the spring in front of the woman. While the die is spinning, she picks up the next spring and puts it in the tweezers and repeats. Face shown.

Scene 33: Reads: Notice the operator sometimes uses two fixations instead of three.

Scene 34: Woman shown using tweezers to place relay spring in die. She then releases the die, which spins quickly and dispenses the spring in front of the man. While the die is spinning, she picks up the next spring and puts it in the tweezers and repeats. Face and hands shown.

Scene 35: Reads: After 7,500 Cycles. Woman shown using tweezers to place relay spring in die. She then releases the die, which spins quickly and dispenses the spring in front of the woman. While the die is spinning, she picks up the next spring and puts it in the tweezers and repeats. Hands and face shown.

Scene 36: Reads: The left hand now is coordinating much better. Note how easily and fast the part is turned ready for the tweezers.

Scene 37: Woman shown using tweezers to place relay spring in die. She then releases the die, which spins quickly and dispenses the spring in front of the woman. While the die is spinning, she picks up the next spring and puts it in the tweezers and repeats. Hands and face shown.

Scene 38: Reads: After 10,000 Cycles. The right hand now has developed a knack of grasping the part and locating it in the die.

Scene 39: Woman shown using tweezers to place relay spring in die. She then releases the die, which spins quickly and dispenses the spring in front of the woman. While the die is spinning, she picks up the next spring and puts it in the tweezers and repeats. Hands and face shown.
Scene 40: Woman shown standing in front of pile of miscellaneous paper and other materials. She picks up a small object from the pile, wraps it with a piece of paper, and puts it in a small cardboard box. She closes the cardboard box and repeats. Hands shown.

Scene 41: Person shown in front of a work table designed to speed up the task in Scene 40. The table has two wooden boxes for holding the cardboard boxes and two wooden wedges in front of the wooden boxes. The person grabs two cardboard boxes, one with each hand, and pushes the box down on the wedge, opening the box and covering the wedge. They close one end of each box and pull the box off the wedge. They then place two objects—a small piece of metal and a piece of paper—into each cardboard box and closes each box. Repeats. Hands shown.

Scene 42: Person shown in front of table with three piles of materials: one of small envelopes, and two separate piles of small rings. The person puts one of each ring into the envelope using a single hand and seals the envelope. They then place their hand over a can near the edge of the screen. Repeats. Hands shown.

Scene 43: Person shown using a different apparatus to do same task as in Scene 41. Using two hands, the person takes two envelopes, places them with their open side up underneath two metal funnels, pushes the two rings through the funnels and into the envelopes, and closes the envelopes. Repeats. Hands shown.

Scene 44: Two men show looking into the camera, laughing and talking.

Scene 45: Three men shown standing around a table with several materials on it. The boxes from Scenes 39 and 40 are in two of the men’s hands. A book laid open and several unidentified metal objects are also on the table. The men are shaking their fists. One is wielding a mallet. All three men smile and shake hands.

Record Albums, 1950-1959
Note: Due to the fragile nature of these records, they are currently inaccessible.

16” Record, 1950
Side One: WBAA recording of Francis Wilson interviewing Dr. Lillian Gilbreth, November 1, 1950
Side Two: London Forum, August 30, 1950

7” Record, 1959
Dr. Lillian Gilbreth at the A-V Center of the University of Massachusetts, June 7, 1959

Box 57 Audio/Visual Ephemera, ca. 1928-1968
Film Ephemera, ca. 1928-1968
[Correspondence regarding film, papers and notes found in Gilbreth film cans; includes scene by scene description of the “Original Films of Frank Gilbreth”]
Slide Ephemera, ca. 1940s-1960s
[notes found with slides]
Audio Reel Ephemera, ca. 1960-1968
[notes & photocopies of original audio reel boxes]
Mrs. John Carney’s Recollections of Lillian Gilbreth and the Girl Scouts of America, 1979 [transcript of audio recording]
Photograph, Captions, ca. 1921 [photocopy of letter sent by Frank Gilbreth to Professor Frank Watts with photo captions to various Gilbreth photos]

Box 58 Slide Viewer, undated

Series 8
Flowcharts, ca. 1908-1938
8.5 Cubic Feet

Box 59 Flowcharts, 1920-1938
“Capping Brush or Mirror, New York University,” 1938. [Simulations Motion Cycle Chart]
“Button Making,” 1920 [process chart]
Box 60  **Flowcharts, n.d.**
Unclassified Mathematical Charts, n.d. [11 charts]

Box 61  **Flowcharts, n.d.**
Pears Soap / Lever Brothers, n.d. [process chart]
[**Note: fragile**]

Box 62  **Flowchart, n.d.**
Pears Soap / Lever Brothers, n.d. [process chart]
[**Note: fragile**]

Box 63  **Flowchart, n.d.**
“Process Chart for Customer in Dennison’s Retail Store,” n.d.

Box 64  **Flowchart, n.d.**
“Wiggly Block Assembly,” n.d.

Box 65  **Flowcharts, n.d.**
Process chart for laundry, n.d. [2 pieces]

Box 66  **Flowchart, 1931**
“Simo Chart of R-5 Sub-Assembly Leeds and Northrup Company,” January 20, 1931

Box 67  **Flowcharts, n.d.**
“Process Charts of Pressing Collarette Shirt – Henley Fold,” Cluett Peabody Company,
 n.d. [5 charts]

Box 68  **Flowchart, n.d.**
Boxing soap, Lever Brothers, n.d.

Box 69  **Flowcharts, 1931 and undated**
“A Guide to the Method to be used in Analysis and Standardization of a Job,” 1931 [student’s chart]

Box 70  **Flowchart, n.d.**
“Motions of Dr. Wylie Putting O’Connor Wiggly Blocks Together,” n.d. [simo chart]

Box 71  **Flowcharts, ca. 1928-1930**
Folding shirts, 1929 (?). [simo chart]
“Simo Chart Burroughs Adding Machine,” 1928 [3 charts]

Box 72 Flowcharts, n.d.
“Regal Shoe Company. The One Best Way to Get the One Best Style and Fit,” n.d. [5 charts]

Box 73 Flowchart, 1925
“Process Chart of Making Change in a Department Store,” February 12, 1925 [R.H. Macy Company]

Box 74 Flowcharts, ca. 1908-1913
Photocopies of charts, ca. 1908-1913 [37 pieces]
[subjects include weekly earnings, handkerchief folding, Tabor Tools, Taylor Swinging Door, and Herrmann Aukam Company]

Box 75 Oversized Flowcharts, ca. 1917-1928
Double enlargement of typist photograph, n.d.
“Simultaneous Motion Cycle Chart. Epileptic Assembling Blocks to Board,” March 6, 1920
“Simo Music Chart,” n.d. [4 charts]
“Grading Skill of Man on Particular Job,” April 8, 1928 [2 charts]
“Elemental Sources of Satisfaction,” May 1928 [2 charts]

Series 9
Awards & Artifacts, ca. 1917-1984
15 Cubic Feet

Location AS Box 76 Plaques, Lillian Gilbreth, 1951-1965
Honorary Membership Certificate, Methods Time Measurement Association for Standards and Research, 1951
New York State Society of Professional Engineers, 1954
Frank and Lillian Gilbreth Industrial Engineering Award, 1961 [American Institute of Industrial Engineers]
Honorary Citizen of Lubbock Texas, 1965

**Awards Ephemera, ca. 1962-1988**
Awards Brochures, 1962-1968
  Gilbreth Hall, University of Rhode Island, 1962
  Hoover Medal, 1966
  Missouri Honor Award for Distinguished Service in Engineering, 1968
Lillian Gilbreth Stamp Ceremony, ca. 1984
  [informational folder from the ceremony for the Lillian Gilbreth Stamp held at Montclair State College; includes brochures, first run stamps, and information sheets regarding Lillian Gilbreth and the college]
Gilbreth Stamp Clippings, ca. 1984
  [newspaper and magazine clippings regarding the Lillian Gilbreth stamp]
Gilbreth Stamp Correspondence, ca. 1981-1984
  [correspondence regarding the Lillian Gilbreth Stamp; correspondents include
Gilbreth family members, friends, and the public

Engineering and Science Hall of Fame, 1988
[clippings, correspondence, and notes regarding Frank and Lillian Gilbreth’s induction into the Engineering and Science Hall of Fame]

Location AS Box 89 Certificates and Award Ephemera, ca. 1962-1988
Certificates, ca. 1940-1968
  Fellowship & Good Cheer, n.d.
  Hospital Management Systems Society, n.d.
  Engineering Woman’s Club, 1940
  Industrial Engineering College of Chicago, 1945
  American Hospital Association, 1954
  Honorable Order of Kentucky Colonels, 1961
  International Work Simplification Institute, 1967
  President’s Committee on Employment of the Handicapped, 1967

Commencement Programs and Award Brochures, 1950-1968
Wallace Clark Award, 1951
  [correspondence regarding award]
Washington Award, 1954
  [correspondence, telegrams, and articles regarding the award]
Taiwan Scroll, 1968
  [translation and note]
Materials Relating to Various Awards, 1934-1972
  [clippings, correspondence, and promotional materials]

Location VT Box 90 Certificate and Diploma holders, n.d.

Location VT Box 91 Artifacts, n.d. and 1953
Stereo Slide Viewer, n.d.
  [Ica Multiplast Stereo Slide Viewer given to Frank Gilbreth by Germany’s Zeiss Works for payment on a pre-World War I consulting project. Gilbreth used the viewer to view and project micromotion images for demonstrations and study.]
Silk Autographs, 1953
  [Pink silk with signatures of attendees of the farewell cocktail party held by the faculty of the Taiwan College of Engineering, 1953]
Series 10
Printed Material, ca. 1873-1988
3 cubic feet

Location AS  Box 92  Books Owned by the Gilbreths, ca. 1873-1905
A New Phyhiognomical Chart, ca. 1873 by J. Simms
Hypatia, 1897 by Charles Kingsley
Book of Mormon, 1905 translated by Joseph Smith

Location AS  Box 93  Printed Material, ca. 1904-1988
Frank Gilbreth, ca. 1904-1968
Frank Gilbreth, ca. 1904-1968
[newspaper clippings collected by Gilbreth, court summons, quotes, Gilbreth Summer School application, and various brochures]
S.S. Frank Gilbreth, 1943-1944
[correspondence regarding the S.S. Frank Gilbreth]
Lillian Gilbreth, ca. 1926-1988
Resume / CV Data, n.d.
[copies of Lillian Gilbreth’s resumes, bios, and bibliography]
[promotional materials featuring Lillian Gilbreth]
Publication Agreement, 1926
[contract for “Efficiency in Home Management”]
Collected by Lillian Gilbreth, ca. 1919-1972
Resumes, ca. 1950s-1960s
[engineering and management resumes submitted to Dr. Gilbreth]
Colleges and Universities, ca. 1930-1968
[letters, brochures, programs, and articles regarding various institutions of higher education]
Newsletters, ca. 1919-1966

1388. Lillian Gilbreth speaking before the Women Chemical Engineers of the Philippines, 1964
1389. Frank B. Gilbreth exhibit by Purdue’s School of Industrial Engineering, n.d.
1390. Lillian M. Gilbreth standing next to a framed photograph of herself at Washington University, Gilbreth Room, 1961
1391. Lillian M. Gilbreth standing next to a framed photograph of her late husband, Frank B. Gilbreth, at Washington University, Gilbreth Room, 1961
1392. Lillian Gilbreth and unidentified man, Washington University, 1961
1393. Lillian Gilbreth, and four, unidentified men, Washington University, 1961
1394. Two, unidentified women, and an unidentified man, 1963
1395. Dr. Lillian Gilbreth and President G. Homer Durham, 1964 [Dr. Gilbreth is receiving her honorary degree, Doctor of Laws, and President Durham is congratulating her; Arizona State University]
1396. Lillian Gilbreth, Gilbreth Testimonial AMETA, 1967
1397. Photograph of Lillian Gilbreth wearing cap and gown, and ten unidentified men wearing gowns and holding caps, n.d.
1398. Lillian Gilbreth and Herbert Hoover, Jr. holding a box which contains the Hoover Medal, n.d.
1399. Lillian Gilbreth receiving framed montage from unidentified man, 1967
1400. Lillian Gilbreth presented with the Los Angeles State College Associated Students Award, 1950
1401. Photograph of a medal presented to Lillian Gilbreth, 1968

Location    AS    Box 127    Friends of Ernestine Gilbreth, ca. 1919-2000

1402. Helen Douglas Ladd, ca. 1919
1403. Unidentified couple on a postcard, 1957
1404. Older couple, woman wearing shawl, 1980
1405. Couple in evening dress, n.d.
1406. Three women wearing sashes, n.d.
1407. Smith reunion [?], n.d.
1408. Dot and Rey with neighbors grandchildren, ca. 1980
1409. Dot and Rey’s 60th Anniversary, 1980
1410. Dot and Rey’s 55th Anniversary, 1975
1411. Women attending engineering conference at Boca Raton, 1978
1412. A newborn baby, 2000
1413. Two girls holding newborn baby, 2000
1414. Older couple with a girl, 2000
1415. Woman beside a pool, 1978
1416. Two women and a man standing in a doorway, 2000
1417. Three women and a man standing in a doorway, 2000

Location AS Box 122 Damaged Photographs, ca. 1924-1960s
Lillian Gilbreth, ca. 1950s-1960s
Lillian Gilbreth with Others, ca. 1920s-1960s
Unidentified People, ca. 1924-1960s

Location AS Box 125 Photograph Ephemera, ca. 1920s-1971
[printed ephemera found mixed in with Gilbreth photographs; materials include letters, envelopes, notes, brochures, and photocopies of various Gilbreth photographs w/ notes by Ernestine Carey]

Series 13
Oversized Materials, ca. 1920-1978
2 Cubic Feet

Box 123 A Oversized Materials, ca. 1920-1978
Honorary Doctorates, ca. 1920-1959
Brown University, Doctor of Philosophy, n.d.
University of Michigan, Doctor of Mechanical Arts (?), n.d.
Brown University, Doctor of Science, n.d.
University of Maine, Doctor of Laws, 1920
Masarykova Akademie Práce, Clenský Diplom, 1924
Rutgers College, Doctor of Science, 1929
University of California, Berkley, Doctor of Laws, 1933
Stevens Institute of Technology, Doctor of Engineering, 1950
Russell Sage College, Doctor of Science, 1931
Smith College, Doctor of Science, 1945
Temple University (?), Doctor of Humanities (?), 1949
Milwaukee – Downer College, Doctor of Science, 1951
International Committee of Scientific Management, Doctor of Science (?), 1951
Syracuse University (?), Doctor of Engineering, 1952
Lafayette College, Doctor of Science, 1952
Princeton University, Doctor of Engineering, 1953
University of Massachusetts, Doctor of Science, 1959
Certificates and Citations, ca. 1924-1968
Oriental Certificate, n.d.
Society for the Advancement of Management and the American Society of Mechanical Engineers, n.d.
Taiwan Provincial College of Engineering, n.d.
Society of Industrial Engineers, 1924 [Frank Gilbreth death memorial]
Masarykova Akademie Práce, 1924
Institute of Management, 1927
State of New Jersey Board of Regents, 1929
Delegate on the part of the United States to the Sixth International Conference for Scientific Management, 1932
Delegate on the part of the United States to the Sixth International Conference for Scientific Management, 1935
American Federation of the Physically Handicapped, 1942
Engineering Institute of Canada, 1949
American Institute of Industrial Engineers, 1950
American Society of Mechanical Engineers, 1950
City Council of Paris, 1951
Civil Defense Advisory Council, 1951
[signed by President Harry S. Truman]
Comité International de l’ Organisation Scientifique International, 1951
British Institute of Management, 1951
Australian Institute of Management, 1953
Australian Institute of Management (Sydney), 1953
Australian Institute of Management (Adelaide), 1953
Association of Management and Industrial Engineers of the Philippines, 1953
Le Comité International de l’ Organisation Scientifique Membre, 1958
Work Study Association of South Africa, 1960
Duquesne University, 1962
Hoover Medal, 1966
Institution of Production Engineers, 1967
City of Huntsville, 1967
Great Navy of the State of Nebraska, 1967
Personnel Club of New York, 1968
Artifacts, ca. 1924-1978
Letter, Czechoslovak Minister to Frank B. Gilbreth, 1924
Cartoon, 1964
[caption:"It is a part of a good wife's job to prepare her husband for retirement says Dr. Gilbreth – visiting American Management Consultant;” Courier-Mail, Brisbane, Australia]
Drawing, ca. 1978
[pencil drawing of the oil portrait of Lillian Gilbreth by Leanabel Jacobs]
Oversized Photographs, 1960
[Large mounted photographs from a disabled homemakers display, University of Connecticut, School of Home Economics, Rehabilitation Research, 1960] [See pages 91-92 for photograph descriptions]

Series 14
James S. Perkins, ca. 1940-1995
1 Cubic Foot

Location AS Box 124 James S. Perkins, ca. 1940-1995
Books, ca. 1945-1967
*The Elements of Administration* by L. Urwick, ca. 1945
*Management of Printing Production* by Robert S. Roy, 1953
*Incentives in Manufacturing* by R.C. Scott, 1967

Studies and Reports, ca. 1940 - 1977
“Motion Study,” n.d.
“Seeing,” n.d.
“Iowa Skill Study, Fatigue Chart,” ca. 1940
“The Western Electric – Iowa Study,” 1940
“Phillipsburg Inserting Machine Standards,” 1977

Clippings, 1950-1991
[magazine articles regarding work simplification and James Perkins]
Correspondence, ca. 1960s-1990s
[correspondence between Perkins and the Gilbreth family]

Original Films of Frank Gilbreth, ca. 1948-1995
Promotional Materials, ca. 1948-1968
[brochures and announcements]
Correspondence, ca. 1960s-1995
Script, ca. 1968
[narration script]
N-File article, n.d.

**Gilbreth Addendum, ca. 1940s-2005**

2 Cubic Feet

**Location AS  Box 1  Addendum, ca. 1940s-2005**

[report written by Lillian Gilbreth]
Books, 1975-2001 [books containing references to Lillian Gilbreth]
Portraits from The Americans: The Democratic Experience, introduction by Daniel J. Boorstein, 1975
First Ladies of Business compiled by Mary Goljenboom, 2001
Periodicals, 1978-2000
[periodicals containing articles about Frank and Lillian Gilbreth]
Clippings and Articles, ca. 1940s-2000s
[clippings and articles regarding the Gilbreths and motion study]
Papers, 1987-1996
[papers written by researchers regarding Frank and Lillian Gilbreth]
Thesis, 1992
[copies of thesis by Laurel Graham regarding Lillian Gilbreth]
Gilbreth Network, ca. 1997-2003 [newsletters]
James Kavanagh, 1997
[letters sent to Jack Gilbreth from James Kavanagh who served on the S.S. Frank B. Gilbreth]
Albers, 1954-2005
[donated letter from Lillian Gilbreth to Professor Albers]

Genealogical Materials, n.d.
[photocopies of Gilbreth genealogical materials relating to the Gilbreth and Bunker families]

Promotional Materials, ca. 1972-2005
[brochures and flyers regarding various Gilbreth events]

Photographs, ca. 1979-1989
Wm C. Trenhaft, James L. Hayes, and Casimir Greenley, ca. early 1979
Ernestine Gilbreth Carey at Purdue, 1989
Dowden, Keith, ca. 1977-1981
[file collected by Dowden regarding Gilbreth Collection; materials include clippings, letter, and certificate]

Box 2  Addendum Artifact, Chronocyclegraph Apparatus, n.d.
[chronocyclegraph apparatus, similar to the ones used by the Gilbreths, owned by Gilbreth student, Anne Shaw. The apparatus was used to measure movement of subjects through the use of electric lights attached to the hands and fingers. As movements were photographed, light trails produced by the apparatus made it possible to study the exact hand and finger movement involved in performing tasks. Gilbreth could adjust the blinking lights in order to obtain measurements in second and millisecond increments.]
