Collection Description

Scope

The Vertical Files (1900s-2000s, 182 cubic ft.) documents a variety of events, people, and institutions related to Purdue University, the Greater Lafayette area, and Indiana.

The files are an artificial collection created by Karnes Archives and Special Collections to record the history and significant events surrounding a variety of topics. The most prominent subjects include Purdue buildings, alumni, faculty, staff, fraternities, sororities, athletics, departments, libraries, university presidents, students, and student life. The collection was periodically added to by ASC staff until 2008. The files contain primarily newspaper articles, but also feature excerpts from books, press releases, and other document types. Most documents are facsimiles. The files are organized alphabetically by subject.

Descriptive Rules Describing Archives: A Content Standard

Processing Information

Most newsprint has been photocopied and in most cases original newspaper clippings have been discarded. Some clippings containing images of people or color graphics, or front pages of newspapers, have been preserved for display purposes, with photocopies made available for research.
