Descriptive Summary

Creator Information	Purdue University, College of Agriculture, Agricultural Research at Purdue
Title	College of Agriculture, Agricultural Research at Purdue, records
Collection Identifier	UA 28
Date Span	1888-2001
Abstract	Bulletins, circulars, correspondence, financial records, letter books, research bulletins, and reports documenting the history, administration, and activities of Agricultural Research at Purdue and its predecessor, the Purdue University Agricultural Experiment Station. The vast majority of materials in this collection are related to the Experiment Station.
Extent	31.6 cubic feet (18 c.f. boxes, 37 mss. boxes, 3 card boxes)
Finding Aid Author	John Michael Foster, 2013
Languages	English
Repository	Virginia Kelly Karnes Archives and Special Collections Research Center, Purdue University Libraries

Administrative Information

Location Information:	ASC
Access Restrictions:	Collection is open for research. Certain materials, such as the Experiment Station letter books, are fragile and need to be handled with care.
Acquisition Information:	Records transfer, Purdue University
Custodial History:	Chris Sigurdson, Agricultural Communication, to ASC; Purdue University Libraries to ASC; College of Agriculture to ASC J.C. Allen glass plate negatives (Acc. #2008031)

comprising Boxes 56-58 were donated by the
Agronomy Department.

Preferred Citation: UA 28, College of Agriculture, Agricultural Research at
Purdue, Records, Karnes Archives and Special
Collections, Purdue University Libraries

History of Agricultural Research at Purdue

Agricultural Research at Purdue began with the laying out of several plots around campus for experimental agricultural work in the 1880s. In 1887, Congress passed the Hatch Act, authorizing the creation of experiment stations at state land-grant colleges with an annual appropriation of \$15,000. The U.S. Department of Agriculture created the Office of Experiment Stations in 1888 to serve as a liaison between the land-grant colleges. Purdue's Agricultural Experiment Station (AES) was created the same year. The AES conducted research, published results of research in bulletins, and released research findings to the press. Between 1887 and 1905, the Experiment Station published 106 pamphlet bulletins and 112 newspaper bulletins pertaining to agricultural research and experiments. Hundreds of additional bulletins and circulars were published by AES over the next century. Commenting on the success of AES, Purdue historian Robert W. Topping wrote in 1988: "The payoff to Indiana agriculture has been incalculable; Indiana is one of the few states with no need for a separate state department of agriculture. Instead, the typical functions of such a department are carried on in Purdue's agricultural complex – state inspection and control of fertilizer quality, animal feedstuffs quality control, the state cholera serum laboratory, creamery licensing, seed inspection, and, at one point in history, stallion registration – not to mention the office of the state chemist." The name of AES was changed to Agricultural Research in the early 1990s.

Today, Agricultural Research at Purdue has a number of strategic themes that guide research efforts. These themes are related to sustainable foods, molecular approach, bioeconomy, food and health enhancement, ecological and environmental integrity, and improvement of economic and social well-being.

Collection Description

Scope

The College of Agriculture, Agricultural Research at Purdue, Records (1888-2001; 31.6 cubic feet) documents the history, administration, and activities of Agricultural Research at Purdue and its predecessor, the Agricultural Experiment Station. In addition to many other types of materials, the collection includes correspondence (1900s-1950s), financial records (1920s-1930s), reports (1920s-2000s), circulars (1900s-1950s) and bulletins (1880s-1990s), and letter books (1890s). The collection also contains research bulletins from other universities (1920s-1960s), as well as materials pertaining to Purdue's Experiment Farms (1910s-1930s). Nearly all of the materials in the collection are from the Experiment Station era, 1888-1993.

The Records are organized into single series largely arranged chronologically by type of document material.

Descriptive Rules Describing Archives: A Content Standard

Processing Information

All materials are housed in acid-free manuscript boxes. Some materials have been placed in acid-free folders. Others remain in their original folders.

Revision History

Collection identifier updated from UA 14.19 to UA 28 as of January 27, 2017.

DETAILED DESCRIPTION OF THE COLLECTION

Box 1 Experiment Station, Correspondence, 1902-1904

Folder

1. A, 1902-1904
2. B, 1902-1904
3. C, 1902-1904
4. D, 1902-1904
